

Just 19 more days to go, till the first Avenger finally hit the silver screen. Just in time are some snippets of new conceptual art for Joe Johnston's upcoming Captain America: The First Avengers. In 1942, Steve Rogers (Chris Evans) is deemed physically unfit to enlist in the U.S. Army and fight the Nazis in World War II. Volunteering instead for Project: Rebirth, a secret military operation, he is physically transformed into a super-soldier dubbed Captain America. With sidekick Bucky Barnes (Sebastian Stan), he fights the Red Skull (Hugo Weaving), Hitler's treacherous head of advanced weaponry, whose own plan for world domination involves a seemingly magical object known as the Tesseract. Captain America: The First Avenger will hit cinemas July 22nd, 2011.
