

As it did with the previous installment, Paramount pictures has moved the release date for Transformers: Dark of the Moon up a few days, so the film will open on a Wednesday rather than a Friday. This will allow all of the haters out there to hate two days earlier and the believers to sit back and enjoy massive amounts of explosions and robots a few days earlier as well. The film will be released in both 2D and 3D formats, as well as in IMAX theaters.

Transformers: Dark of the Moon stars Shia LaBeouf, Rosie Huntington-Whiteley, Josh Duhamel, Tyrese Gibson, Kevin Dunn, Julie White, Frances McDormand, John Malkovich, Ken Jeong, Patrick Dempsey, Alan Tudyk, John Turturro and Leonard Nimoy. This marks the third and final film in Michael Bay's Transformers trilogy.
